**Scout your canola fields for these insects and diseases!**

*Flea Beetle*

*Diamond Back Moth*

*Cabbage Seedpod Weevil*

*Tarnished Plant or Lygus Bug*

*Alternaria Leaf Damage*

*Sclerotinia Stem Damage*

If you find significant evidence of any of these, consult your agronomist about treatment.

More information can be found in the Ontario Canola Growing Guide or on the Canola Council of Canada website at [www.canola-council.org](http://www.canola-council.org).
